## DETAILED ACTION

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States
- 2. Claims 3-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Soichi (09015560).

Regarding claim 3, Soichi teaches of a liquid crystal display device (see title) comprising pixels equipped with a liquid crystal cell (Fig. 1, reference character 23) and a switch element (Fig. 1, reference character 25), which are arranged at positions where scan lines and data lines intersect (see Fig. 1, reference characters 27 and 29), a data line drive circuit for supplying from said data line and said switch element to said liquid crystal cell a write signal corresponding with image data (Fig. 1, reference character 12), a control circuit for inverting a polarity of said write signal after every plurality of scan lines (Fig 1, reference character 17), and a scan line drive circuit which supplies a drive signal to said scan lines and switches said switch elements ON and OFF (Fig. 1, reference character 13), so that of the plurality of scan lines to which is supplied a write signal of the same polarity, in the following scan lines other than those scan lines where the polarity of said write signal is inverted, said drive signal is supplied for a period of time that is shorter, by a predetermined amount of time, than the time for which said drive signal is supplied to the scan lines where the polarity of said drive signal is inverted (see constitution, lines 8-13).

Application/Control Number: 10/762,502

Art Unit: 2673

Regarding claim 4, Soichi teaches that said scan line drive circuit (Fig. 1, reference character 13) adjusts a period for which said drive signal is supplied, in accordance with an output enable signal for controlling whether or not to supply said drive signal to said scan line (see constitution, lines 8-13).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ricardo L. Osorio whose telephone number is 703 305-2248. The examiner can normally be reached on Monday through Thursday from 7:00 A.M. to 5:30 P.M. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bipin Shalwala whose telephone number is 703 305-4938.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to:

703 872-9306 (for Technology Center 2600 only)

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington, VA, Sixth Floor (Receptionist).

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you

Application/Control Number: 10/762,502

Art Unit: 2673

have questions on access to the Private PAIR system, contact the Electronic Business

Center (EBC) at 866-217-9197 (toll-free).
